

SUSTAINABLE STEPS

Brought to you by Arielle Gerstein
Sustainability Coordinator

Printing Reduction Competition Update

We are now halfway through the County's six month printing reduction competition. After evaluating May to August 2021 compared to May to August 2022, these are the departments/DCAs currently in the lead:

- Economic Development
- Human Resources
- DCA General Services

A majority of County departments and DCAs have decreased their printing in this three month timeframe compared to last year – keep up the good work! When the competition is complete, at the end of October, the winning department or DCA will receive a prize.

If you are interested in how your department is measuring up, please contact Arielle at agerstein@charlestoncounty.org.

Greenhouse Gas Inventory Webinar for Sierra Club

Description: Charleston County's Sustainability Coordinator, Arielle Gerstein, will discuss findings from the County's newly released first Greenhouse Gas Inventory which provides greenhouse gas emissions data for the entire County, County government, and separate data about municipalities within the County. This inventory will be used as a starting point for planning and implementing actions to reduce these emissions.

When: September 1, 2022 @ 7 p.m. EST

Where: Robert Scott Small Room 235 Auditorium
175 Calhoun Street, College of Charleston
